

Month 1: UI, CSS, JavaScript & React

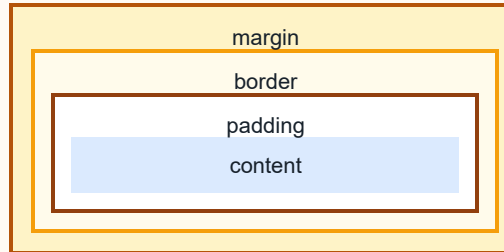

Use this sheet to see the relationships before testing yourself with the cards.

HTML Page Structure

```
<header> <nav> <main> <footer>
```

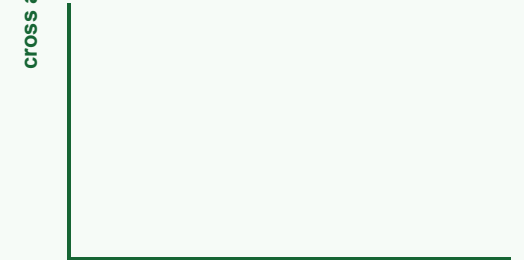

CSS Box Model

border-box keeps padding and borders inside the declared size.

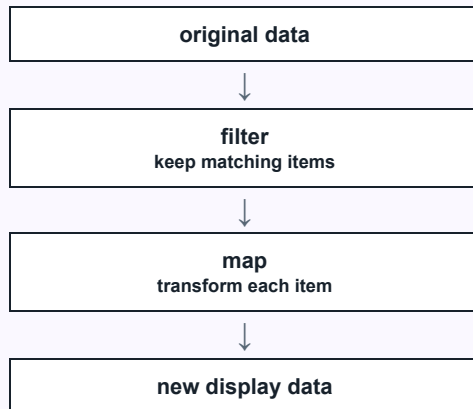

```
* { box-sizing: border-box; }
```

Flexbox Axes

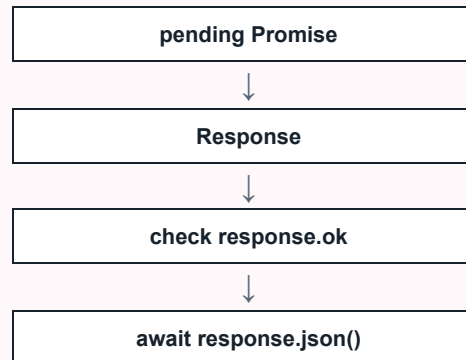

- **justify-content**: main axis
- **align-items**: cross axis
- **flex-direction**: chooses the main axis

JavaScript Data Flow

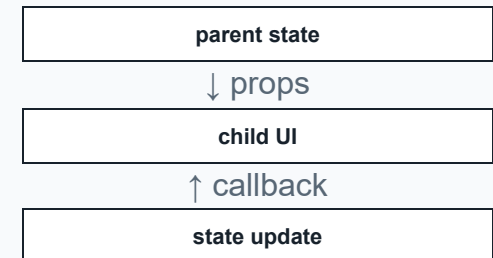

```
items.filter(test).map(transform)
```

fetch Request Flow

HTTP 404 or 500 usually requires a manual **response.ok** check.

React Data Flow

```
setCount(prev => prev + 1)
```

Use stable keys and immutable updates.
